

Vendor and Tender User Guide

From registration to award

Illustrated instructions for applicants, vendor contacts, administrators, procurement, managers, committee members and evaluators.

71 numbered procedures • Role-based instructions • Current application screenshots • Printable opening record • Regret letter • Team testing checklist

Edition 1 | 5 October 2026

Prepared for team familiarisation and acceptance testing. Demonstration screenshots come from an isolated application copy. Follow your organisation's authorised test portal and account assignments.

01 How to use this guide

Who: All testers

Open: Your organisation's test portal

1. Ask the test coordinator for the correct portal link and your own test account. Confirm whether payments use the bank's UAT environment before making a test payment.
2. Find the chapter for your role. Each procedure gives the menu/page, numbered actions, the expected result, and a suggested test.
3. Use a unique company CR and tender reference for each test run. Keep the same reference when handing work to the next role.
4. Record results in the supplied TEST_CHECKLIST.csv. Report a failure with the page, reference, time, exact message and a screenshot.

Expected result

The team can follow one complete vendor-to-tender test and identify the step where a problem occurs.

Remember: Edition 1 • 5 October 2026 • English. This guide follows the current local application. Screenshots use sample accounts and records in an isolated test copy. They illustrate screens and states; they do not prove a real payment, SMS or email was delivered. Your live company names, fees, document types, permissions and dates may differ. Create and Edit Tender use the same six-step layout. No application changes are part of this guide.

[Start here](#)

02 Who does what

Who: Administrator and test coordinator

Open: Users, Vendor Portal and Tender role inboxes

1. Prepare separate accounts for the administrator, procurement user, procurement manager, department requester, department manager, finance reviewer, technical evaluator and commercial evaluator.
2. Prepare three different committee users: Chairman, Secretary and Member. Assign them to the tender; one shared account cannot replace all three confirmations.
3. Prepare at least two vendor companies: one successful bidder and one unsuccessful bidder. Add a third invited vendor who does not bid to check recipient boundaries.
4. Give each person the relevant role permission and company/department assignment. Menu visibility follows those permissions and assignments.

Expected result

Every handover goes to the correct person and company.

Role	Main work
Administrator	Vendor master data, staff accounts/assignments, registration review and accounting permissions
Vendor owner	Own CR profile, contacts, registration/payment and tender participation
Vendor editor / bidder / viewer	CR-specific access according to the assigned portal role
Department requester / manager	Request creation and department approval
Finance / Committee request reviewer	Finance verification and committee request approval
Procurement / Procurement Manager	Tender preparation, approval, publication, changes, correspondence and final award
Chairman / Secretary / Member	Own opening code confirmation, opened bid review and digital signature
Technical / Commercial evaluator	Stage-specific bid review, findings and questions through procurement

[Start here](#)

03 Sign in, OTP and choose a CR

Who: Staff and vendor contacts

Open: Sign in

1. Enter your registered email and your own password. A vendor can enter the registered CR instead of email; the password must belong to an authorised user of that CR.
2. Click Sign in. If OTP is required for your account, enter the current code delivered to your configured SMS or email destination and confirm it.
3. If your email is linked to several vendor CRs, choose the company/CR you want to work with and continue. With one eligible CR, the portal selects it directly.
4. Check the company name and CR shown at the top of the Vendor Workspace. Use Switch CR to change company when you have several memberships.
5. Use Forgot password? if needed. If the OTP destination is missing or incorrect, ask the administrator to correct your account details.

Expected result

The correct staff workspace or vendor CR opens only after the required authentication.

Remember: Login OTP and the tender's three opening codes are different. Never use a committee opening code as a sign-in OTP. A CR identifies a company; it does not grant access to a person who is not linked to that company.

Team test: Try email and CR login; test a shared email with two CRs; confirm another vendor's CR cannot be opened.

Port of Duqm Portal

Sign in

Use your registered email or vendor CR number and your own password to continue.

Email or CR number

Please register first if you do not have an account.

Gate Pass Account Application

Visitors and contractors can apply for a Gate Pass portal login to submit and track gate pass requests.

Figure 03. Sign in by email or CR number — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

[Start here](#)

04 Switch between your vendor companies

Who: Vendor with multiple authorised CRs

Open: Vendor Portal → Switch CR

1. Click Switch CR near the company/CR badge.
2. Read each company name and CR before selecting a radio option.
3. Continue and check the badge again before adding documents, answering a tender or making a payment.
4. Repeat with your second CR. Each company keeps its own profile, fee history and tender invitations.

Expected result

All actions apply to the selected CR.

Team test: Invite one CR to a closed tender; switch to another CR and confirm that invitation does not transfer.

Figure 04. Choose the vendor CR — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Administrator setup

05 Create staff users and assign tender responsibilities

Who: Administrator

Open: Tender Users master pages / Team and Roles & Permissions

1. Open the relevant Tender Users page: Department, Department Manager, Finance, Committee, Procurement, Procurement Manager, Technical or Commercial Users.
2. Add the person's name and registered email. Enter the initial password when creating a new login and the correct phone/OTP details where available.
3. Choose the correct company; add the department for department-based roles. Keep the assignment Active.
4. Save. Confirm the user appears in the relevant role master and can see the expected inbox when signing in.
5. When editing other details, leave password fields empty to retain the existing password. Fill them only when intentionally changing it.

Expected result

Assigned active users are available in tender team selectors and their own inboxes.

Remember: A general staff account alone does not guarantee inclusion in a tender team. The correct role-master assignment and the required permissions must also exist. The account's configured OTP delivery method applies at sign-in.

Team test: Create a technical user in the correct company; confirm selection is available. Check a user assigned to a different company is excluded.

Port of Duqm QA

Login OTP delivery

Use system default

After the password, send the login code using this method when login OTP is enabled. This choice applies across all modules for this account. Only an administrator can change an existing account's choice.

Email

Email

Enter an email first. If the user does not exist, complete the user profile and password below.

Figure 05. Create or edit a procurement user — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Administrator setup

06 Set vendor groups and registration fees

Who: Administrator

Open: Vendors Master → Vendor Groups

1. Click Add or edit an existing vendor group.
2. Enter Name and Code, then the Default validity days for the registration period.
3. Set Registration fee in the displayed currency. A positive amount requires payment. A zero fee follows the waiver review process.
4. For waived groups, ensure Riyadhha is configured and applicable. A waived registration requires a Riyadhha certificate even if the general checkbox is not selected.
5. Keep the group Active and save. Check the fee summary shown when an applicant selects that group.

Expected result

Applicants see the fee and document rules for the selected group.

Remember: The OMR amounts in screenshots are demonstration amounts. Use the organisation's authorised rates. Do not assume changing a group price rewrites an existing paid transaction.

Team test: Check one paid group and one zero-fee group. Confirm the zero-fee applicant is pending review, not automatically registered.

Port of Duqm QA ×

Name	Demo Local Suppliers
Code	PAIDCOMBINED1791104860
Default validity days	365
Registration fee (OMR)	24.125
Enter 0 for a waiver. Applicants must upload Riyadhha and await approval. A positive fee is paid during registration. Current fees are shared with Vendor Group Fees; existing applications keep their quoted amount.	
Requires Riyadhha	☒ Yes (always required for a waived registration)
Status	☒ Active

Close Save

Figure 06. Vendor Groups settings — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Administrator setup

07 Maintain effective vendor fee records

Who: Administrator

Open: Vendors Master → Vendor Group Fees

- 1. Open the fee list and choose Add or edit the relevant group's fee record.
- 2. Select the vendor group and Fee Type: Registration Fee or Renewal Fee. Enter the amount/currency and Active From / Active To dates shown by the form.
- 3. Make the fee record active for the intended period, then save.
- 4. Select that group in a sample registration and confirm the application's displayed quote before payment.

Expected result

Registration/renewal uses the applicable configured fee record and displays the payable amount.

Remember: Coordinate changes to active fee periods with the administrator. The applicant should pay the server's displayed quote; entering an amount in the browser does not set the fee.

Figure 07. Set registration or renewal fee — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Administrator setup

08 Set group-specific registration documents

Who: Administrator

Open: Vendors Master → Vendor Document Types

- 1. Click Add document type. Choose a vendor group, or the All vendor groups option when the type applies globally.
- 2. Enter a clear Name and Code. Select Required for a mandatory upload and Active for a type currently in use.
- 3. Save and repeat for each required type. Configure Riyadhha Certificate for the applicable waived group.
- 4. Open a sample registration, select the group and review the Documents section. Its mandatory types should appear as fixed upload rows.
- 5. Change groups and check the refreshed requirements. Additional applicable documents remain optional unless the type is marked Required.

Expected result

Required uploads follow the selected group and cannot be relabelled by the applicant.

Team test: Configure two required types for one group. Try submitting with one missing, then upload both. Check a different group gets its own types.

Figure 08. Vendor Document Types settings — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Administrator setup

09 Maintain grades, categories and specialties

Who: Administrator

Open: Vendors Master → Vendor Grades; vendor categories/subcategories

- 1. Add/edit grade names, codes, ordering and active status in Vendor Grades.
- 2. Maintain categories and subcategories used to describe supplier capabilities. Link each subcategory to its correct category.
- 3. Review vendors' submitted specialties before using them to target closed tenders.
- 4. Use the Specialties Filter page to search vendors by their category/subcategory and related filters.

Expected result

Procurement can use clear, maintained grades and specialty filters when selecting vendors.

Remember: Creating a grade or specialty definition does not automatically assign it to every vendor. Check each vendor's approved details.

Figure 09. Filter vendors by specialties — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Vendor registration

10 Open the registration page and enter company details

Who: New vendor applicant

Open: Vendor Registration Application / guest_vendor

1. Open the registration link supplied by the organisation. The sign-in page's Vendor Registration button is currently hidden, so use the approved direct registration link.
2. Choose the correct Vendor Group and read its registration fee summary.
3. Enter the legal Vendor Name, company email and unique CR Number. Enter the telephone country code and number in the fields shown.
4. Check VAT and other company details if applicable. Complete every field marked with an asterisk.
5. Continue to Location, Account access and Documents using the section links.

Expected result

The application identifies the company, its CR and the registration rules to apply.

Remember: The company email and the person's account email serve different purposes. Check both. If an existing login email is reused, use that account's existing password rather than creating a conflicting login.

Team test: Try a duplicate active CR and a new CR. Confirm the application rejects the duplicate with a clear message.

The screenshot shows the 'Vendor Registration Application' page. At the top, there is a header with the 'Port of Duqm Operational Portal' logo and a 'Sign in' link. The main heading is 'Vendor Registration Application' with a subtext: 'Create your supplier account and submit the company details procurement needs for review.' On the left, there is a sidebar titled 'Application sections' with a list: '01 Company details', '02 Location', '03 Account access', and '04 Documents'. Below this list, a note states: 'Fields marked with * are required. You can move between sections before submitting.' The main content area is titled '01. Vendor Information' with a subtitle 'Legal, commercial, and primary contact details'. It contains several form fields: 'Vendor Group *' (a dropdown menu showing '- Select Vendor Group -'), 'Vendor Name *' (a text input field), 'Email *' (a text input field), 'CR Number *' (a text input field with placeholder 'Commercial registration number'), 'Phone *' (a dropdown for country code showing 'Oman (+968)' and a text input for the number '71234567'), and 'Contact Person *' (a text input field with placeholder 'Primary contact name'). Below these is a 'Contact Designation' field with placeholder 'Role / designation'. At the bottom, the '02. Location' section is partially visible with the subtitle 'Select your country, region, and city'.

Figure 10. Vendor registration - company details — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Vendor registration

11 Enter the company location

Who: Vendor applicant

Open: Registration → Location

- 1. Select Country first.
- 2. Select an available Region for that country, then a City for that region.
- 3. Enter the company address and other applicable location details.
- 4. If changing the country or region, reselect the dependent fields rather than leaving an old city selected.

Expected result

The saved location belongs to the selected country and region.

Team test: Change country after selecting a region/city and confirm the form refreshes its dependent choices.

02. Location

Select your country, region, and city

Postal Code

Figure 11. Registration company location — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Vendor registration

12 Create or reuse the applicant's login

Who: Vendor applicant

Open: Registration → Account access

- 1. Enter the applicant's name and personal login email in Account access.
- 2. Enter the applicant's mobile number accurately, including the required country code. This is the person's authentication destination when SMS OTP applies.
- 3. For a new login, create a password and confirm it. For an existing email, enter its current password to link another CR to that identity.
- 4. Check the applicant details before submitting; this person becomes the owner/contact for the new vendor CR.

Expected result

The applicant has one verified login identity with a membership for this CR.

Remember: Do not use another person's email or phone. An inactive or disabled existing account requires administrator action; public registration does not reactivate it automatically.

03. Login User

Portal login details for the vendor account owner

Already have a Gate Pass, PTW or Vendor login? Use the same login email and current password below. You can link one account to more than one portal or CR.

Name *

Email *

Personal mobile for login *

Your Oman mobile receives sign-in codes. Use your personal number, not the company telephone. Adding another CR preserves an existing account's login mobile.

Password *

Enter a password. For an existing account, enter its current password to prove ownership; for a new email, this creates the account password.

Confirm Password

Figure 12. Registration account access — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Vendor registration

13 Upload the required registration documents

Who: Vendor applicant

Open: Registration → Documents

- 1. Read the fee summary and the fixed required document rows generated for your selected group.
- 2. Use Choose File for each required type. Upload a readable PDF or image in an allowed format.
- 3. Enter issue and expiry dates where requested/applicable. Check that expiry is not earlier than issue.
- 4. For a waived group, upload the Riyadhha certificate as well as the other required documents.
- 5. Use the additional document option for other applicable supporting files. Review requirements again if you change the group.
- 6. Submit the registration and wait for the success/next-step message.

Expected result

Required documents are saved against their correct types on the vendor's Documents tab.

Team test: Omit one required document and check submission is refused. Upload it and confirm the registration can continue.

The screenshot displays a web form for uploading required documents. It is organized into three main sections, each with a title, a 'Document Type' field, a 'Document' field with a 'Choose File' button, and two date fields: 'Issued At' and 'Expires At'. The first section is titled 'Company Registration Supporting Document (SUPPORTING)'. The second section is titled 'CR Certificate — Required' and includes a 'CR Certificate (CR)' option in the 'Document Type' field. The third section is titled 'Local Supplier Supporting Document — default_lang.optional' and includes a 'Local Supplier Supporting Document (LOCAL-SUPPORT)' option. Each 'Document' field shows 'No file chosen' and a note that 'Allowed formats: PDF and image files.' The date fields are pre-filled with 'dd/mm/yyyy' and include a calendar icon for selection.

Figure 13. Required group documents — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Vendor registration

14 Pay a registration fee

Who: Applicant in a paid group / waiver applicant asked to pay

Open: Limited registration status page → Pay registration fee

1. Sign in using the applicant's email or CR and select the pending company if prompted.
2. Read Registration payment required, the amount/currency and any Procurement message.
3. Click Pay registration fee. Continue to Bank Muscat Smart Gateway and check the merchant amount before completing payment.
4. Complete the bank's authorised test/live payment and allow the browser to return to the portal.
5. Check the application status and payment record. Registration completes after payment has been verified.

Expected result

A verified successful payment activates registration for the correct CR; its transaction is recorded for accounting.

Remember: A cancelled or failed bank payment leaves registration pending. If money was charged but the portal is still pending, ask accounting to check the existing transaction/reference before starting another payment. Screenshots do not show or certify the bank-hosted checkout.

Team test: Run an approved successful payment and an approved cancellation. Check cancellation does not activate the vendor and repeated return does not duplicate the payment.

Figure 14. Registration fee and limited access — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Vendor registration

15 Wait for a waiver decision

Who: Applicant in a waived vendor group

Open: Limited registration status page

- 1. Submit the required documents, including Riyadhha.
- 2. Sign in and check Pending waiver approval for the selected CR.
- 3. Wait for the registration reviewer to approve the waiver or request payment.
- 4. If payment is requested, read the reason and amount and follow the registration payment procedure.

Expected result

Profile, contacts and tenders stay restricted while waiver approval/payment is pending.

Team test: Confirm pending applicants can see status but cannot use full vendor features. Approve the waiver and confirm access becomes available.

Figure 15. Pending registration status — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Vendor registration

16 Review Riyadhha and approve a waiver or require payment

Who: Authorised vendor registration reviewer

Open: Vendors Master → Vendors → vendor details → Registration review

1. Open the vendor and confirm its name, CR, group and pending registration status.
2. Open View Riyadhha certificate and inspect the uploaded evidence.
3. If eligible, select Approve waiver and register vendor. Add an explanatory note if needed and save the registration decision.
4. If not eligible, select Require payment. Enter a positive amount in the displayed currency and a clear Reason / note to applicant.
5. Save registration decision. The applicant can see the requirement and pay; verified settlement then completes registration.

Expected result

The reviewer controls waiver approval or a specific payment requirement, with a saved reason.

Team test: Test the approval path and, using another applicant, the custom-payment path. Check zero/negative custom payment amounts cannot be accepted.

Decision

Require payment

Amount (OMR)

20.000

Reason / note to applicant

Please pay the applicable registration fee.

Save registration decision

Figure 16. Require payment with a reason — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Vendor profile and contacts

17 Read the Vendor Workspace and profile checklist

Who: Registered vendor
Open: Vendor Portal → Overview

- 1. Confirm the company name and CR at the top. Check registration start/expiry and current status.
- 2. Review the Profile Checklist: Company profile, Primary contacts, Bank account, Specialties and Required documents.
- 3. Use the tabs to complete each outstanding item and return to Overview.
- 4. Review Document Expiry and replace documents that have expired or are approaching expiry.

Expected result
The checklist explains what remains before procurement profile review.

Remember: Registration/payment completion and profile approval are separate checks. A registered company may still need a bank account, specialties and documents before submitting its completed profile.

Figure 17. Complete profile and renewal action — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Vendor profile and contacts

18 Add contacts and grant CR-specific portal access

Who: Vendor owner

Open: Vendor Portal → Contacts → Add

- 1. Click Add and enter contact Name, Designation, Email and Mobile.
- 2. Choose Portal access: Viewer for read-only work, Bidder for tender participation, or Editor for profile editing and tenders.
- 3. For a new login, enter and confirm the initial password. For an email with an existing login, its existing password is retained across linked CRs.
- 4. Mark the contact Active and Primary when applicable, then save.
- 5. Ask the contact to sign in with their own email/password and confirm the intended CR and permissions.

Expected result

The contact is linked to this CR with the selected access, without overwriting an existing shared identity.

Remember: The free-text Role/Designation fields do not grant portal permissions. Use Portal access for that. Only an authorised owner can manage contact access; the contact form does not allow someone to assign themselves Owner.

Team test: Create Viewer, Bidder and Editor contacts. Confirm the viewer cannot edit or bid, and a linked multi-CR contact gets the CR selector.

Port of Duqm QA

Name

Designation

Email

This is the contact's login email. It must be unique within this CR.

Portal access

Viewer

Viewer is read-only. Bidder can participate in tenders. Editor can also maintain CR profile data. Only the CR owner can manage contacts.

Initial password

Required for a new login email. If this email already has an active portal account, its existing password is retained and applies to every linked CR.

Confirm password

Mobile

A personal Oman mobile is required for a new login. An existing account keeps its login mobile; an administrator must update that account separately.

Role

Status

Active

Close

Save

Figure 18. Add Contacts — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Vendor profile and contacts

19 Edit or remove a contact and manage passwords

Who: Vendor owner / authorised administrator

Open: Vendor Portal → Contacts; Change Password

1. Use the contact's edit action to correct details or adjust the permitted portal access.
2. Leave password fields empty when only editing other details.
3. Use the available password/access action only for the contact records that permit it. Shared-account password changes affect the login for all linked CRs.
4. Deactivate/remove a contact only when access should end for that CR. Recheck that the person can no longer select that membership.
5. To change your own password, open Change Password and enter the current/new details requested by the form.

Expected result

Contact details and CR access stay current; unrelated linked companies retain their own memberships.

Team test: Edit a phone/designation without re-entering a password. Remove one CR membership from a shared login and check its other valid CR remains accessible.

Change Password
Update the password used to access your vendor account.

Home > Vendor Portal > Change Password

Change Password

This password belongs to your login account and applies to every CR linked to your email.

Current password

New password

Use at least 10 characters (maximum 72 UTF-8 bytes).

Confirm new password

Change Password

Figure 19. Change your password — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Vendor profile and contacts

20 Add or update a bank account

Who: Vendor owner / editor

Open: Vendor Portal → Bank Accounts → Add

- 1. Enter the bank name, branch, account number, SWIFT and IBAN as applicable.
- 2. Upload the bank letterhead/supporting document requested by the form.
- 3. Review the details and save. Check the row’s review status.
- 4. If rejected/returned, read the reviewer’s reason, correct the information and resubmit through the available edit action.

Expected result

The bank details and supporting file are recorded and routed for review.

Remember: Saving a profile change may create a pending Vendor Update Request. It does not always make the change approved immediately.

Vendor profile and contacts

23 Maintain specialties

Who: Vendor owner / editor

Open: Vendor Portal → Specialties → Add

- 1. Choose the relevant category and, where applicable, its subcategory.
- 2. Enter Specialty type/name and a clear description of the services or supplies provided.
- 3. Save and check the pending/approved status.
- 4. Complete any requested correction. Approved specialties may be used for closed-tender targeting.

Expected result

Procurement can identify the company's capabilities accurately.

Team test: Check that a subcategory belongs to its selected category and a vendor with a different specialty is not included by that filter.

24 Upload, preview and replace vendor documents

Who: Vendor owner / editor

Open: Vendor Portal → Documents → Add

- 1. Choose an applicable Document Type and upload a readable allowed file.
- 2. Enter issue/expiry dates where applicable and save.
- 3. Use the document’s view/download action to confirm the correct file opens.
- 4. Check its status and expiry label. Replace/correct an expired or rejected document through the available edit/upload action.

Expected result

Documents remain attached to the correct vendor and type and can be reviewed by authorised users.

Team test: Open a new PDF and an image after uploading; confirm one vendor cannot open another vendor’s private document.

Vendor profile and contacts

25 Submit a completed profile or a renewal

Who: Vendor owner / editor with appropriate access

Open: Vendor Portal → Overview

1. Complete every checklist item. The review button remains disabled while required profile information is incomplete.
2. Read the registration/renewal payment box and the current button label before continuing.
3. Click the displayed review/payment/renewal action. Complete checkout if a fee is due.
4. Return to the portal and check the pending review or registration-period result.
5. For a revision of an already settled period, correct the requested information and resubmit; the same period's recorded payment is retained.

Expected result

The completed profile/renewal reaches the appropriate review state with its payment linked.

Remember: Renewal fees use the configured group fee and registration period. Do not treat the date displayed on a sample screenshot as your own expiry date.

Vendor profile and contacts

26 Review vendor update requests

Who: Authorised administrator / procurement reviewer

Open: Vendors Master → Vendor Update Requests

1. Open the vendor and its pending requests. Inspect the section, changed details and supporting document.
2. Compare the requested change with the current approved data.
3. Approve a valid request, or reject/return it using the available action and a clear reason.
4. Use bulk actions only after reviewing the selected pending requests individually.
5. Confirm the vendor can see the decision and that approved data is applied to the correct CR.

Expected result

Profile changes have an identifiable reviewer and decision; pending/locked sections are not silently overwritten.

Team test: Approve a bank/document change, reject another and check both vendor-visible statuses. Repeating a decision should not apply a second change.

The screenshot displays the 'Vendor Update Requests' page. At the top, there's a breadcrumb 'Home > Vendor Update Requests' and a description: 'Review submitted vendor changes, compare requested updates, and keep approval actions traceable.' Below this is a 'Request Queue' section with a description 'Review submitted change requests, filter by vendor/module, and take action quickly.' and buttons for 'Group by Vendor' and 'Refresh'. There are also filters for 'Audit-friendly', 'Fast filtering', and 'Real-time list'. The main part of the screen is a table with columns: ID, Vendor, Module, Action, Requested by, Date, Status, and a menu icon. The table lists five pending requests for 'Demo Marine Supplies - Second CR', all with the action 'Create' and requested by 'Demo Vendor Owner'. Each row has a 'Select action' dropdown menu.

ID	Vendor	Module	Action	Requested by	Date	Status	
191	Demo Marine Supplies - Second CR	Documents	Create	Demo Vendor Owner	2026-10-04 01:07:49 PM	Pending	Select action ▼

Vendor profile and contacts

27 Review a vendor, set a grade and assign its code

Who: Authorised vendor administrator / reviewer
Open: Vendors Master → Vendors → details / edit

- 1. Open the vendor and inspect registration, documents, contacts, bank details, branches, credentials and specialties.
- 2. Use the allowed status/grade action to record the review outcome.
- 3. For a fully registered vendor, open Edit and enter the optional Vendor Code text field.
- 4. Save and check the code on the vendor details. A second CR has its own vendor record/code.

Expected result

The reviewed vendor has the intended status, grade and company-specific code.

Remember: Vendor Code is an administrative identifier. Vendor sign-in still uses the registered email or CR and the person's password.

Vendor profile and contacts

28 Block, unblock or remove vendor access

Who: Authorised administrator

Open: Vendors Master → Vendors → row actions

1. Confirm the CR and current status before using a block/suspension/removal action.
2. For a block, enter the required reason and confirm the action.
3. Check that the company's restricted status is visible and its tender actions are unavailable where the workflow requires active approval.
4. Use Unblock only after resolving the issue; complete any payable unblock requirement shown by the system before expecting access to be restored.
5. Use removal only for the intended test record. Do not use removal to correct a payment or tender result.

Expected result

Access follows the company's approved/blocked status and the saved reason.

Team test: Block a designated test CR and verify its restrictions; unblock it and confirm the expected restored state.

Vendors

Vendor profile and contacts

29 Check vendor payments and accounting records

Who: Authorised accounting user / administrator

Open: Vendors Master → Vendor accounting

- 1. Search by the vendor/CR, transaction reference or available status/date filters.
- 2. Open the transaction details and read who paid, the payment purpose, amount, currency, status and bank references.
- 3. Compare the application transaction reference with the bank's tracking/reference information.
- 4. Use the available recheck/export actions when appropriate. Review a charged-but-pending payment before asking the applicant to retry.

Expected result

Accounting can cross-reference registration, renewal and other vendor fee transactions.

Remember: A created payment record is not the same as a verified success. Read the status and outcome. Card information is displayed only when returned by the gateway, with sensitive details masked.

Figure 29. Vendor payment accounting — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender requests and creation

30 Understand the two starting routes

Who: Department requester / procurement
Open: Tender Requests or Tender Procurement Inbox

- 1. Use the Department Request route when a department initiates the requirement: Requester → Department Manager → Finance → Committee request approval → Procurement tender creation.
- 2. Use New Tender in Procurement Inbox when procurement starts a tender directly.
- 3. Both routes still require the tender’s Procurement Manager approval before publication.
- 4. Read Request Source, Tender Status, Manager Approval and Workflow Stage separately in the inbox/register.

Expected result
The team knows which approvals belong to the request and which belong to the tender.

Remember: Request Source “Direct” identifies how the tender started. It does not mean manager approval was skipped. A department request’s “Manager approved” status is different from the tender’s Procurement Manager decision.

Figure 30. Procurement Inbox — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender requests and creation

31 Create a department tender request

Who: Department requester

Open: Tender → Tender Requests → Add

- 1. Enter the reference, subject, description, request date, budget and other required request details.
- 2. Check the company/department and configured Department Manager.
- 3. Choose the tender type and evaluation method/weights. Select the proposed technical and commercial users and three different committee people.
- 4. Add suggested vendors and other applicable details shown by the form.
- 5. Save the draft. Use the Submit action on its row when ready; saving alone does not submit the request.

Expected result

The request becomes Submitted and is available to its assigned Department Manager.

Team test: Save a draft, confirm it is not in the manager’s actionable queue, then Submit and confirm the handover.

Tender requests and creation

32 Approve or reject the department request

Who: Assigned Department Manager

Open: Tender → Department Manager Inbox

- 1. Open the submitted request and review the requirement, budget, teams and suggested vendors.
- 2. Approve if it is ready. Use Reject with a clear comment if it needs correction.
- 3. Confirm the decision. An approved request becomes Manager approved for Finance verification.
- 4. For rejection, the requester should read the reason, edit the request and submit it again.

Expected result

Only a submitted request is decided by its authorised Department Manager.

Brief Description

Supply certified safety equipment for port operations. Delivery to Port of Duqm.

Figure 35. Tender Details — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender requests and creation

36 Step 1 — tender details, method and fees

Who: Procurement user
Open: Create/Edit Tender → Tender Details

- 1. Enter a unique Reference and a clear Title. Select Company and Department.
- 2. Choose Open for the open invitation route or Closed for a targeted vendor audience.
- 3. Choose the displayed Evaluation Method. Set Technical Weight and Commercial Weight; together they must equal 100%.
- 4. Enter Tender Fees in OMR. Zero means no tender fee; a positive amount creates the vendor fee requirement.
- 5. Write a clear Brief Description. Leave Submit for Procurement Manager Approval selected when ready for review.

Expected result
The tender’s identity, audience type, evaluation weighting and fee are explicit.

Remember: Open means eligible portal vendors can see the published tender. It does not mean draft tenders or sealed bids are public, or that an unauthorised login can submit.

Tender Details

Core tender identity, ownership, and high-level scope.

Procurement can start the tender directly from this page.

Supply certified safety equipment for port operations. Delivery to Port of Duqm.

Figure 36. Tender Details — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender requests and creation

37 Step 2 — set all tender dates

Who: Procurement user

Open: Create/Edit Tender → Milestones

1. Enter the Tender Release date/time and Last Date of Document Purchase.
2. Enter Site Visit date/time when applicable, its Location, Mandatory attendance setting and Site Visit Instructions.
3. Set Clarification Submission Deadline and Tender Submission Deadline.
4. Set Bid Opening after submission closing. Set Technical Evaluation after bid opening and Commercial Evaluation after the technical deadline.
5. Check all dates and times in order. Friday and Saturday cannot be used for tender milestones.

Expected result

The schedule is valid and defines when each user action is available.

Remember: Use the portal's configured local time; this application's tender date handling uses Asia/Muscat. Enter a time as well as a date. A future release date does not open bidding immediately. If the closing date moves and later dates shift automatically, review every resulting field before saving.

Team test: Try opening before closing, equal opening/closing time, a Friday milestone and weights not totalling 100. Confirm invalid values are refused.

Milestone	Meaning / relation
Release	Starts the published tender's availability period
Document purchase deadline	Last time for required tender fee/document purchase; on or before submission closing
Site visit	Visit arrangements; on or before closing
Clarification deadline	Ordinary vendor question cutoff; on or before closing
Submission deadline	Last time to submit/update a bid
Bid opening	Must be later than submission closing
Technical evaluation deadline	Must follow closing/opening
Commercial evaluation deadline	Must follow the technical deadline

Milestones

Key tender dates and stage deadlines.

Friday and Saturday are non-working days and cannot be selected for tender milestones.

User guide • Edition 1 | 5 October 2026

43

Tender requests and creation

38 Step 3 — assign evaluators and opening members

Who: Procurement user

Open: Create/Edit Tender → Team Assignment

1. Select the Technical Evaluation Team from the correct company's active technical users.
2. Select the Commercial Evaluation Team from that company's active commercial users.
3. Select one Chairman and one Secretary.
4. Select at least one separate ITC Member. Chairman, Secretary and the confirming Member must be different people.
5. Confirm each person can sign in and has the correct role-master assignment before sending the tender for approval.

Expected result

Each stage reaches its assigned users and three different roles can unlock bids.

Team test: Choose the same person for two opening roles and check the form refuses it; verify all three assigned accounts see the correct tender.

Team Assignment

Assign evaluators and ITC members before publishing.

Figure 38. Team Assignment — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender requests and creation

39 Step 4 — choose a flexible closed-tender audience

Who: Procurement user

Open: Create/Edit Tender → Target Vendors

1. For a closed tender, choose the combined/flexible targeting option shown by the form.
2. Select any required Vendor Group, Vendor Grade, Category and Subcategory/specialties.
3. All selected filters match together. For example, SME + Grade A + the chosen specialty selects vendors meeting all three.
4. Use Select Vendors to add named extra vendors. They are included in addition to the filter matches, even if they do not match those filters.
5. Review the audience preview/count and selected vendors. Remove any unintended extra invitee before saving.

Expected result

Only the intended eligible CRs can see the closed tender when published.

Remember: An invitation is attached to the vendor CR, not every company belonging to a shared email login. Recheck the audience after changing groups/grades/specialties.

Team test: Use one vendor matching all filters, one matching only some, one named extra and one unrelated vendor; confirm their visibility independently.

Figure 39. Target Vendors — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender requests and creation

40 Step 5 — required proposals and item pricing

Who: Procurement user
Open: Create/Edit Tender → Documents

- 1. Select the bid sections required from vendors: Technical Proposal, Commercial With Price, Commercial Without Price and Bank Guarantee as applicable.
- 2. Complete the Tender Details fields such as PR No, delivery location, INCOTERM, required-on date, terms reference, notes and enclosures.
- 3. Add the Schedule Rate items: serial number, description, UOM, quantity and optional Part No.
- 4. Review quantities and descriptions. Vendors enter their own unit prices when item pricing is configured.

Expected result
Bidders know which files and priced items are required.

Team test: Submit a bid with a missing required section and confirm it is refused. Check item quantities and computed line totals.

Add Document File

Drag-and-drop documents here
(or click to browse...)

Figure 40. Documents and Requirements — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender requests and creation

41 Upload tender documents and control download access

Who: Procurement user

Open: Create/Edit Tender → Documents → Add Document File

1. Click Add Document File and select the specification or other tender attachment.
2. Enter its title/type in the upload preview fields.
3. Set Download Access / time-limited access and expiry hours if the document should have limited download availability.
4. Review the uploaded file list and existing documents before saving.
5. For a published tender, submit the change for manager approval; pending new attachments are not vendor-visible until approved.

Expected result

Tender documents are saved with the intended title, type and visibility rules.

Remember: Preview, download and expiry access are controlled by the user's role and tender state. A file visible to procurement is not automatically available to every vendor.

Figure 41. Upload tender documents and set access — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender requests and creation

42 Step 6 — preview and submit for manager approval

Who: Procurement user

Open: Create/Edit Tender → Preview → Save Tender

1. Review details, every date, assigned teams, target vendors, bid requirements, item schedule and uploaded files.
2. Return to a previous step to correct any field. Leave Submit for Procurement Manager Approval selected when ready.
3. Click the final Save Tender button and wait for the success message.
4. Return to Procurement Inbox and inspect Tender Status and Manager Approval separately.
5. A draft saved without submission remains a draft. Open it again and select the approval option to submit when ready.

Expected result

A submitted tender remains unpublished while Manager Approval is Pending.

Remember: Tender Status may still say Draft while Manager Approval says Pending. This is the expected pre-publication state. Do not judge approval routing from the Draft label alone.

Team test: Save without approval submission; then submit and verify the separate manager account receives it.

Figure 42. Preview and Save Tender — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender approval and bidding

43 Procurement Manager — approve, return or reject

Who: Procurement Manager

Open: Tender → Procurement Manager Inbox → tender details

1. Open the Pending tender and read details, dates, documents, audience, requirements and teams.
2. Use Approve when ready. For a published change, review the proposed change before applying it.
3. Use Return for Update with a specific comment when procurement must revise the tender.
4. Use Reject request with a reason for a rejected approval request.
5. Confirm the decision and ask procurement to check the corresponding manager status/message.

Expected result

Approval authorises the next step; a revision sends the tender back to procurement with the comment.

Remember: Manager approval does not itself publish a new draft. Procurement must perform publication. Initial approval, update approval and cancellation approval are different request types.

Team test: Run one approval and one return/revise/resubmit path using separate users.

The image shows a 'Review Decision' interface. At the top, it says 'Pending Change' and 'Initial tender approval'. Below that, it shows 'Reviewed By' as 'Demo Manager' and 'Reviewed At' as '2026-10-04 01:10:14 PM'. There is a 'Comment' section with a text box containing the placeholder text 'Add a note for approval or explain what procurement must update.' At the bottom, there are three buttons: a green 'Approve' button with a checkmark icon, an orange 'Return for Update' button with a left arrow icon, and a red 'Reject request' button.

Figure 43. Approve, return or reject — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender approval and bidding

44 Publish an approved tender

Who: Procurement user

Open: Tender → Procurement Inbox → tender row / approved tender edit

- 1. Check Manager Approval is Approved and the tender setup is complete.
- 2. Use Publish on the tender row, or the Publish After Manager Approval option when shown in the approved tender form.
- 3. Confirm Tender Status becomes Published.
- 4. Sign in as an eligible vendor and check availability after the release time. Check a closed tender's invitation against the correct CR.

Expected result

Eligible vendors can view the published tender during its permitted period.

Team test: Try publication while manager approval is pending and confirm it is refused. Check a future release is not prematurely open.

Figure 44. Publish after manager approval — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender approval and bidding

45 Change or extend tender dates after publication

Who: Procurement user, then Procurement Manager

Open: Tender Register Detail → Edit Schedule / Procurement Inbox → Edit

1. Open the correct tender and choose Edit Schedule or its edit action.
2. Open Milestones and amend the intended date/time. Review all subsequent dates, including any automatic shifts after closing changes.
3. Review the remaining wizard steps and Preview. Submit Change for Procurement Manager Approval and save.
4. The manager reviews and approves the proposed update. Until approval, the existing published dates remain in effect.
5. After approval, confirm the new dates in the register and vendor portal and check the schedule update communication/history.

Expected result

Approved date changes become effective with a recorded old/new schedule.

Remember: Awarded/cancelled tenders cannot be edited as normal active tenders. A pending schedule request is not a deadline extension until approved.

Team test: Propose an extension and compare vendor dates before and after manager approval. Try an invalid sequence and confirm it is rejected.

Edit Tender

Tender approval and bidding

46 Vendor — find a tender, pay its fee and request participation

Who: Vendor owner/editor/bidder

Open: Vendor Portal → Tenders → View tender

- 1. Check the selected CR, tender title/reference and schedule.
- 2. Review Overview, Tender Details and available Tender Documents.
- 3. If a tender fee is required, use Pay Tender Fee before the purchase deadline and complete the approved bank checkout.
- 4. If Request procurement approval is shown, submit that request and wait for procurement’s decision.
- 5. When the fee/participation requirements are satisfied and bidding is open, the Bid Submission form becomes available.

Expected result

Only an eligible approved vendor can move to bid submission under the tender’s requirements.

Remember: Vendor registration payment and an individual tender fee are separate transactions. An invitation or fee payment alone does not replace a participation approval that the page still requires.

Figure 46. Vendor tender details — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender approval and bidding

47 Procurement — approve vendor participation

Who: Procurement user
Open: Tender Register Detail → Vendors

- 1. Open the relevant tender and select Vendors.
- 2. Find the vendor with pending procurement participation approval and check its CR, fee and eligibility.
- 3. Use the available Approve or Reject action. Enter the reason requested for rejection.
- 4. Ask the vendor to refresh that tender and confirm its approval/status and bid availability.

Expected result
Participation decisions apply only to the reviewed vendor/tender.

Team test: Approve one vendor and reject another; confirm neither decision changes unrelated vendors or another CR.

Vendor	Invite	Participation Approval	Bid	Submitted	Amount	D
Demo Logistics LLC demo-nonbidder@example.invalid	Opened 2026-10-04 01:10:14 PM	Approved	Not Submitted	-	-

Figure 47. Approve or reject vendor participation — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender approval and bidding

48 Vendor — submit or update the full bid

Who: Vendor owner/editor/bidder

Open: Vendor Portal → Tenders → tender → Bid Submission

- 1. Confirm bidding is open and all fee/participation requirements shown on the page are satisfied.
- 2. Enter Total Amount and Currency, or fill each vendor unit price when the tender contains item pricing. Review computed line totals and the grand total.
- 3. Upload every Required proposal section. Keep priced and unpriced commercial files in their correct fields.
- 4. Click Submit Bid. Check the confirmation and submitted status/time.
- 5. For changes before closing, use Update Bid and replace the intended file(s). Check the Current file/download links.
- 6. After closing, ordinary bid submission/update is unavailable; contact procurement if a formal clarification is requested.

Expected result

The bid is submitted for the correct CR with its amount, item prices and required documents.

Team test: Try missing technical/commercial files, a valid full submission and an update before closing. Confirm no update is accepted after closing.

Clarifications and attachments

49 Vendor — send a question to procurement

Who: Authorised participating/eligible vendor user

Open: Tender detail → Clarifications & Replies

1. Select Clarification Type: General/Procurement, Technical or Commercial as appropriate.
2. Write a clear question referring to the tender item/document.
3. Attach supporting files using Attach Files when needed.
4. Click Submit Clarification before the ordinary clarification deadline.
5. Read the reply thread and attachments when procurement responds.

Expected result

The question goes through procurement, including questions intended for the technical or commercial team.

Remember: An evaluation-stage question relayed by procurement may allow a targeted late response even after ordinary questions close. That exception does not reopen bidding or permit unrelated vendors to ask late questions.

Team test: Send General, Technical and Commercial questions with attachments. Confirm internal evaluator messages are not visible before procurement shares a reply.

Clarification Type

General

Send Clarification

Clarifications and attachments

50 Procurement — reply, forward or publish to all vendors

Who: Procurement user

Open: Procurement Inbox → Clarifications → tender → Open Chat

- 1. Open the vendor chat and select the correct Related Thread.
- 2. Choose the Clarification Type and Visibility.
- 3. Select Reply to this vendor for a private answer; Forward internally to technical team or commercial team for expert input; Publish to all vendors for a shared answer.
- 4. Write the message, attach files and click Send Reply.
- 5. Check the resulting thread and ask the intended recipient to verify the message/attachment.

Expected result

The selected visibility controls who receives the message and attached files.

Remember: Review a private vendor attachment before forwarding or publishing it. Internal forwarding/replies stay internal until procurement explicitly shares a vendor-visible response.

Team test: Send one private reply and one public reply. Check another vendor sees only the public one; check commercial-only internal attachments remain unavailable to the technical team.

Clarifications and attachments

51 Technical/commercial team — respond through procurement

Who: Assigned technical or commercial evaluator

Open: Team Clarifications / evaluation detail → messages to procurement

1. Open the tender’s team clarification inbox/thread or the relevant bid’s evaluation screen.
2. Read the question forwarded by procurement and open the permitted attachments.
3. Reply internally to procurement with the answer and any supporting files.
4. For a new evaluator question, use the message/request clarification form. Identify the vendor/bid when the question is specific.
5. Procurement decides whether to relay the answer privately, publish it to eligible vendors or ask the vendor for further information.

Expected result

Procurement remains between vendors and evaluator teams.

Remember: General evaluator messages belong to the tender; bid-specific requests refer to that vendor. Neither becomes vendor-visible automatically.

Technical clarifications

Internal correspondence with procurement. Vendor replies are published by procurement.

Clarifications and attachments

52 Publish an announcement, circular or tender group update

Who: Procurement user

Open: Tender Register Detail → Communications → Publish Group Update

1. Choose the displayed Update Type, such as an announcement/circular.
2. Enter a clear Subject and Message describing the update.
3. Attach the relevant supporting file(s).
4. Publish the update and check it in the communications list and an eligible vendor's tender page.

Expected result

The tender's permitted vendor audience can read the published update and attachment.

Remember: To address only one vendor, use its clarification chat and private visibility. Publishing a message about a new deadline does not replace the formal Edit Schedule approval process.

Publish Group Update

Circulars and addenda are visible to all vendors who can access this tender.

Figure 52. Publish group updates and attachments — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Three-key bid opening

53 Check the tender is ready for Bid Opening

Who: Assigned committee and procurement

Open: Tender → Bid Opening Inbox

- 1. Wait until bid submission has closed and the scheduled opening time has arrived.
- 2. Confirm the tender is Closed and its Workflow Stage is Bid Opening.
- 3. Confirm Chairman, Secretary and Member are three different assigned users who can sign in.
- 4. Open the tender's opening action in Bid Opening Inbox.

Expected result

The committee can begin the opening session for the correct closed tender.

Remember: There is one three-key bid opening for the full package. Technical evaluators still see technical material only at their review stage; committee opening access does not remove evaluator restrictions.

Figure 53. Bid Opening Inbox — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Three-key bid opening

54 Generate the three role codes

Who: Authorised assigned committee member

Open: Bid Opening action → Generate 3-Key Codes

- 1. Check the reference/title and your assigned opening role.
- 2. Click Generate 3-Key Codes if no active session exists.
- 3. Note the displayed expiry time and coordinate the three people to confirm within it.
- 4. Each member opens their own session/account to retrieve only their assigned role code.

Expected result

A protected opening session holds separate Chairman, Secretary and Member codes.

Remember: Opening codes have a five-minute validity in the current implementation. Regeneration is restricted after a confirmation attempt or unlock. If expired/unavailable, report the tender reference and contact an authorised committee administrator; do not guess repeatedly.

Figure 54. Generate 3-Key Codes — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Three-key bid opening

55 Each person confirms only their own role code

Who: Chairman, Secretary and Member separately

Open: Own Bid Opening action → Confirm My Code

- 1. Sign in to your own account and open the correct tender's opening action.
- 2. Read Your Role and Your assigned role code.
- 3. Enter that six-digit code in Confirm your assigned role code and click Confirm My Code.
- 4. Check that your role now shows confirmed. The first two people wait for the remaining role(s).
- 5. After all three different roles confirm, the bids unlock and the full committee package becomes available.

Expected result

All three authorised confirmations are required before unlocking.

Remember: The code shown in this guide is a short-lived sample from the test copy. Use the code shown in your own current session. Do not share sign-in passwords or try another person's code.

Team test: Confirm only two roles and check bids stay locked; confirm the third and check unlock. Test an unassigned user and an expired code in designated test records.

Port of Duqm QA

Bid Opening

Reference: GUIDE-2026-001

Title: Supply of Marine Safety Equipment

Opening Stage: Bid Opening

Your Role: Chairman

Codes expire at: 2026-10-05 15:30:25

Chairman confirmed: No

Secretary confirmed: No

Member confirmed: No

Your assigned role code: 051441

Confirm your assigned role code

.....

Close

Confirm My Code

Figure 55. Confirm your own assigned role code — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Three-key bid opening

56 Review the opened package and sign digitally

Who: Each assigned committee member

Open: Bid Opening Inbox → tender details

1. Review every submitted vendor and the permitted technical, commercial and bank guarantee files.
2. Check the bid amounts, submitted information and package summary.
3. Enter Signature Name and draw your signature in the pad.
4. Select the confirmation checkbox and click Sign Bid Opening.
5. Each of the three people repeats this using their own account. Check Chairman, Secretary and Member all show Signed.

Expected result

The opening form records the three reviewers' signatures and the completed opening state.

Remember: Code confirmation and signature are separate actions. Bids can be unlocked while signatures are still pending; procurement cannot start normal technical review until the signature/form requirement is satisfied.

Signature Name

Demo chairman

Digital Signature

☒ I confirm the opened bid package and sign the bid opening form digitally.

 **Sign Bid Opening**

Figure 56. Draw and confirm a signature — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Three-key bid opening

57 Print the official Bid Opening Record

Who: Assigned committee / procurement with report access

Open: Tender detail / Tender Register → Bid Opening Form

1. Open Bid Opening Form after the permitted opening state is reached.
2. Check reference, company, vendors, bid values, sections and signatures.
3. Use the PDF/print action to open the supplied Port of Duqm Bid Opening Record layout.
4. Print or save the PDF and check that all vendors and any continuation pages are included.

Expected result

The committee/procurement has a readable record in the approved template layout.

Team test: Print a tender with several bidders; check draft/non-submitted bids are not represented as submitted bids.

EVERYTHING CONNECTED

BID OPENING RECORD

Tender Number	GUIDE-2026-001
Tender Title	Supply of Marine Safety Equipment
Tender Budget	Not recorded OMR
Opening Date	05 October 2026
Submission Date	04 October 2026
Time & Place	15:25 / PODC Tender Committee Meeting

Figure 57. Official Bid Opening Record — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Three-key bid opening

58 Procurement — check proposals and start technical review

Who: Procurement user

Open: Tender Register Detail → Procurement Proposal Review

- 1. Confirm all three signatures are complete and download/check the generated bid opening form.
- 2. Review the opened technical and commercial proposal package for completeness.
- 3. Select the generated-form confirmation checkbox and enter any Procurement Review Note.
- 4. Set the Technical Review Open Until date/time when requested and click Start Technical Review.
- 5. If an approved manual signed form is used as a fallback, upload it using the separate Manual Signed Bid Opening Form action and check acceptance first.

Expected result

The recorded procurement handover allows technical evaluators to begin.

Remember: A workflow date alone does not replace this procurement review gate. The manual signed form is a documented fallback, not an instruction to skip committee review.

☐ **Confirm generated bid opening form is correct**

Procurement Review Note

Optional note before sending to evaluation team

Technical Review Open Until

06/10/2026 11:49 AM

Confirm Generated Form & Start Technical Review

Figure 58. Procurement proposal review — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Evaluation and award

59 Technical evaluation — score, findings and decision

Who: Assigned technical evaluator

Open: Tender → Technical Inbox → tender → bid review

- 1. Open the tender and choose a bid in Bids Pending Your Action.
- 2. Preview/download the Technical Proposal and inspect supporting clarification replies.
- 3. Score every displayed criterion from zero up to its Weight; add criterion comments as needed.
- 4. Choose Technical Accepted or Technical Rejected. Enter an evaluation comment and upload Technical Findings Documents when appropriate.
- 5. Click Save Evaluation and check My Finalized Decisions. Repeat for all assigned bids.
- 6. Use the question-to-procurement form for further clarification rather than emailing a vendor outside the recorded workflow.

Expected result

The technical outcome and score are recorded; commercial prices stay outside the technical review screen.

Remember: Another evaluator’s finalized bid may be read-only. Your own finalized evaluation may remain editable when the current stage permits it. Do not assume every person can overwrite another evaluator’s decision.

Team test: Try a score above its criterion weight; check refusal. Verify technical users cannot open priced commercial files directly.

Port of Duqm QA

Technical Review - Demo Marine Supplies LLC

Tender: GUIDE-2026-001 / Supply of Marine Safety Equipment

Submitted At: 2026-10-04 01:10:16 PM

Current Score: 70.000 / 70.000

Technical Proposal: No technical file

Pending

Score this bidder against the technical criteria, then mark the bid as technically accepted or rejected.

Technical Decision

- Select -

Save Evaluation

Ask Procurement For Clarification

Use this when the vendor's technical submission needs more information. Procurement will contact the vendor and forward the response back to the

Figure 59. Technical bid evaluation — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Evaluation and award

60 Commercial evaluation — review pricing and choose the outcome

Who: Assigned commercial evaluator

Open: Tender → Commercial Inbox → tender → bid review

- 1. Open the tender when the Commercial stage is available and review technically eligible bids.
- 2. Review the permitted proposal documents, item prices, quantities, totals and commercial clarification replies.
- 3. Enter the Commercial Score shown by the form within its allowed range, and choose Commercial Approved or Commercial Rejected.
- 4. Add the commercial evaluation comment/findings and save.
- 5. Complete the remaining eligible bids. Check the intended selected bidder and avoid selecting more than one commercial approved winner.

Expected result

The commercial outcome and weighted ranking support the final award decision.

Remember: Commercial approval is not final tender award. Procurement must finalise the tender afterward. Different evaluation methods/weights affect the displayed ranking.

Team test: Check score limits, one selected bidder and one rejected bidder. Confirm an early commercial action before its stage is refused.

Figure 60. Commercial bid evaluation — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Evaluation and award

61 Review late evaluations before awarding

Who: Procurement user

Open: Tender Register Detail → Evaluations

1. Review the technical/commercial summaries and any Late / Pending review indicators.
2. Open the evaluation and assess why it was submitted after its deadline.
3. Use the available late review accept/approve or reject action and enter any requested reason.
4. Check that the pending late review has a recorded decision before final award.

Expected result

Unreviewed late decisions do not silently become a final award basis.

Team test: Use a designated late evaluation and confirm award is refused until procurement records the required decision.

Weighted Evaluation Ranking						
Final score is calculated from the procurement technical and commercial weights for this tender.						
Technical 70.00% / Commercial 30.00%						
Rank	Vendor	Technical Raw	Technical Weighted	Commercial Raw	Commercial Weighted	Final Weighted Score
#1	Demo Marine Supplies LLC Bid #56	70.000 of 70.000 (100.00%)	70.000 of 70.000 points	90.000 of 100.000 (90.00%)	27.000 of 30.000 points	97.000 of 100.000 points
#2	Demo Safety Trading LLC Bid #57	70.000 of 70.000 (100.00%)	70.000 of 70.000 points	80.000 of 100.000 (80.00%)	24.000 of 30.000 points	94.000 of 100.000 points

Vendor	Evaluator	Decision	Total Score	Score Breakdown	Comments	Technical Findings	Review Duration
Demo Safety Trading LLC	Demo Technical	Accepted	70.000	-	QA accepted	-	-
Demo Marine Supplies LLC	Demo Technical	Accepted	70.000	-	QA accepted	-	-

Vendor	Evaluator	Decision	Total Score	Score Breakdown	Comments	Commercial Findings	Review Duration
Demo Safety Trading LLC	Demo Commercial	Rejected	80.000	-	QA unsuccessful bid	-	-
Demo Marine Supplies LLC	Demo Commercial	Accepted	90.000	-	QA selected bid	-	-

Figure 61. Technical and commercial evaluation results — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Evaluation and award

62 Finalise the tender award

Who: Procurement user

Open: Tender → Procurement Inbox → Award action

- 1. Check the tender is at Award Decision, its evaluations are complete and one intended commercial approved vendor is selected.
- 2. Review any late evaluations, bid documents and the result details in Tender Register.
- 3. Use Award and confirm the finalisation prompt.
- 4. Check Tender Status becomes Awarded and the selected vendor is correct.
- 5. Check the result letters and email delivery summary. Final award is a final action; do not repeat it to resend an email.

Expected result

The winning bidder receives an award result; unsuccessful actual bidders receive regret results.

Remember: Award/refusal checks remain active even for administrators. A result-email failure does not erase an already recorded portal result.

Team test: Attempt award too early and with pending late review. After a valid award, repeat the action and confirm no duplicate result letters are created.

Figure 62. Tender ready for final award — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Evaluation and award

63 Successful vendor — view the award letter

Who: Winning vendor user

Open: Vendor Portal → tender → View / print result letter

- 1. Open the awarded tender for the correct CR.
- 2. Read the successful bid message and the result details.
- 3. Click View / print result letter.
- 4. Check company name, tender reference, title and award details, then use Print / Save as PDF.

Expected result

The winning bidder can retain its own letter of award.

Team test: Check another vendor’s login cannot retrieve the winner’s letter by changing the URL.

Figure 63. Letter of award — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Evaluation and award

64 Unsuccessful bidder — regret letter and email delivery

Who: Unsuccessful bidder; procurement checks delivery

Open: Vendor Portal → awarded tender → result letter; Tender Register → result email status

1. The unsuccessful actual bidder opens the awarded tender and reads the outcome.
2. Use View / print result letter to obtain the personalised regret PDF in the supplied template.
3. Check the bidder name, tender reference/title and the letter wording.
4. Procurement checks the result-email status. If a delivery failed, use Retry failed result emails after the email issue is corrected.
5. Check the unsuccessful bidder's inbox for the email and attached PDF; a stored letter alone does not confirm email arrival.

Expected result

Each unsuccessful actual bidder has its own regret letter; failed email delivery is visible and retryable.

Remember: An invited vendor who never submitted an actual bid does not receive a losing-bidder regret letter. Successful emails are not resent by the failed-only retry action.

Team test: Check one winner, one unsuccessful bidder and one invited non-bidder. Verify the correct letter/email recipient for each.

Figure 64. Personalised regret letter — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender register and exception handling

65 Use the Tender Register and audit tabs

Who: Authorised procurement/report user
Open: Tender → Tender Register → details

- 1. Search/filter tenders by reference and the available status/stage/company/date controls.
- 2. Use Overview for main facts and key dates; Tender Details for the item/terms schedule; Timeline for milestones.
- 3. Use Vendors for invitations, fee/participation and submitted bids; Evaluations for scores, findings and ranking.
- 4. Use Communications for messages/announcements and Documents & Audit for documents, extensions, workflow history and opening audit.
- 5. Use Edit Schedule and Bid Opening Form only when your role and the tender state allow them.

Expected result

The team can trace a tender from its source through approval, changes, opening and award.

Figure 65. Tender milestones and timeline — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender register and exception handling

66 Cancel a tender through manager approval

Who: Procurement user, then Procurement Manager

Open: Procurement Inbox → cancellation action; Procurement Manager Inbox

- 1. Review the tender and confirm cancellation is the intended business decision.
- 2. Use the cancellation action and confirm submission to the Procurement Manager.
- 3. The manager reviews the cancellation request and approves or returns/rejects it as appropriate.
- 4. Check the final tender status after the manager decision and the vendor-visible outcome.

Expected result

The cancellation is applied only through its required manager approval.

Remember: Do not use cancellation as a substitute for correcting a missing file, a failed email or a payment return. Finalised tenders have state-specific restrictions.

Figure 66. Procurement Inbox — sample screen. Zoom in the PDF or open the image in the offline guide for detail.

Tender register and exception handling

67 Retender and formal workflow reopening

Who: Procurement user / authorised manager

Open: Procurement Inbox → Retender; Tender Register → Workflow Stage Control

- 1. For a retender, use Retender on the eligible source tender and open the new draft.
- 2. Review copied details, teams, audience and requirements. Enter a complete new valid schedule; do not assume the source deadlines remain suitable.
- 3. Submit the new draft for manager approval and publish it through the normal workflow.
- 4. For an exceptional stage reopening, select the intended stage, Stage Open Until and reason in Workflow Stage Control, then submit the request.
- 5. Obtain the manager decision and confirm the effective stage/time before telling users to act again.

Expected result

A retender is a new approved tender; an exceptional reopening is recorded and approved.

Remember: Reopening is an authorised exception, not the normal way to advance the tender. It does not eliminate role, payment, participation, bid-opening or procurement review checks. Cancelled tenders cannot be reopened by the workflow override.

Workflow Stage Control

Use this only when procurement needs to reopen or manually move a delayed tender stage. Later stage dates are pushed forward automatically if needed.

Open Workflow Stage

Bid Submission / Bidding

Tender register and exception handling

68 Tender payment accounting

Who: Authorised accounting user / administrator

Open: Tender Master → Tender accounting

- 1. Find the tender fee transaction by vendor/CR, tender/reference and the available filters.
- 2. Open details and confirm the payer, tender fee purpose, amount/currency, transaction status and bank references.
- 3. Compare the accounting outcome with the vendor’s fee state for that tender.
- 4. Export/recheck using the permitted actions when needed; investigate an existing charged/pending transaction before a new payment.

Expected result

Tender fee payments can be cross-referenced independently of vendor registration fees.

Tender accounting

Review who paid, what the payment was for, and the bank confirmation. Dates filter when the payment was started. Your role determines which sections and companies you can view.

Testing and troubleshooting

69 Read statuses and respond to common problems

Who: All testers

Open: Current page, inbox and reference record

1. If a button is missing, check the role, selected CR/company, assignment and current workflow stage.
2. If a vendor cannot participate, check registration, company approval/expiry/block status, invitation, tender fee, participation decision and date windows.
3. If a tender still says Draft, read Manager Approval. Pending approval is expected before publication; a saved-only draft needs submission.
4. If Bid Opening is unavailable, check closing/opening time, committee assignment, code expiry and whether another role still has to confirm/sign.
5. If an attachment does not open, report its reference/type and error; do not assume a successful upload proves it can be read.
6. If payment/SMS/email fails, record its displayed status/reference and report delivery separately from the saved application result.

Expected result

The report identifies the failed stage without guessing that the entire workflow was bypassed.

Visible state	Meaning / next action
Registration payment required	Pending; complete verified registration payment
Pending waiver approval	Pending; wait for Riyadhha review
Profile pending review / update pending	Reviewer must decide the submitted profile/change
Draft + manager Pending	Unpublished tender awaiting Procurement Manager
Draft + manager Approved	Procurement may publish
Published / Bidding	Eligible vendors act within release/deadline windows
Closed / Bid Opening	Submission ended; committee opening next
Unlocked, signatures pending	Review and sign with all three committee roles
Technical / Commercial	Assigned team performs the relevant evaluation
Award Decision	Procurement reviews readiness and finalises award
Awarded / Cancelled	Final business state; normal edit actions are restricted

Testing and troubleshooting

70 Run one full team acceptance test

Who: Test coordinator and all assigned roles

Open: TEST_CHECKLIST.csv plus this guide

1. Register one paid vendor, one waived vendor and a separate waiver applicant asked to pay. Complete the correct documents and check the limited/full access boundaries.
2. Complete the profiles, add contacts, review updates and check email/CR/multi-CR sign-in with the required OTP policy.
3. Create one direct tender and one department request-route tender. Return one for revision, then approve and publish.
4. Check closed-tender filters and extra invitees; pay any authorised test tender fee and approve participation where required.
5. Exchange private, public, technical and commercial clarifications with attachments. Submit at least two full bids and check deadline restrictions.
6. Complete three different committee confirmations/signatures, print the opening record, then hand over to technical/commercial evaluation.
7. Review any late decisions, award one bidder and verify award/regret letters plus actual delivery statuses.
8. Record Passed, Failed, Blocked or Not tested for every checklist row. Send the completed checklist and issue screenshots to the coordinator.

Expected result

The team has an auditable full workflow result and a precise list of problems to report.

Remember: These are acceptance instructions for the team. This document itself is not a certificate that every live scenario has passed. Use designated test accounts/tenders and the organisation's approved test payment process.

Testing and troubleshooting

71 What to include when reporting an issue

Who: All testers

Open: Issue report template supplied with this guide

1. Record the affected module, page name, tender/vendor/CR reference, user role and the date/time.
2. List the exact actions in order and what you expected.
3. Copy the visible error text and describe what actually happened. Include a screenshot showing the affected control/state.
4. For payment or delivery issues, include the application transaction/message reference and status. Do not include passwords, OTP codes or full card details.
5. Mark the relevant checklist row Failed or Blocked. Keep the original test record available for investigation.

Expected result

The support team can reproduce and locate the problem quickly.
